OUR STORY

Graco Inc. was established in 1926 and today is a world leader in fluid handling solutions. While the company has delivered technology and reliable equipment solutions to the Oil & Natural Gas market for decades, in 2014 it decided to create a dedicated business unit focused on meeting the specific equipment requirements of this dynamic customer base. As a part of those efforts, the company acquired two well respected Oil & Natural Gas equipment manufacturers, Alco Valves Group and High Pressure Equipment Company, to augment its growing portfolio of products designed specifically to meet the exacting needs of this industry.

The company's success is built on its unwavering commitment to technical excellence, world-class manufacturing, and unparalleled customer service. Graco invests heavily in Research and Development, often at several times the rate of its peers, to develop cutting edge technologies that serve the markets of today while preparing for the needs of tomorrow. Graco's line of chemical injection pumps for the Oil & Natural Gas market is just one of the outcomes of this aggressive investment in technology, come talk to us about what's next. Graco Inc. Proven Quality. Leading Technology.

1926

Russell Gray invents an air-powered, portable lubricator; Gray Company is incorporated.

1941

Gray Company develops the Convoy Luber trailer-mounted lube system for World War II.

1955

Fire-Ball™ high pressure lube pump with topper was introduced.

1958

Gray Company introduces Hydra-Spray® – the first airless paint spray unit and paint spray gun.

1965

Hydra-Cat® – Graco's first plural component spraying unit spraying foam insulation.

1983

Graco introduces the PRO™ 4000 electrostatic spray gun, featuring an electrostatic cartridge.

PROVEN QUALITY. LEADING TECHNOLOGY.

- Founded in 1926
- World leader in fluid handling technologies
- Headquartered in Minneapolis, MN USA
- Publicly Traded NYSE: GGG
- More than 3,000 employees
- Global, with major distribution centers in the USA, Belgium, Japan, Korea, China, and Australia
- Majority USA based manufacturing, engineering, and product support
- Leading technology development, Graco holds more than 2,000 patents

1988

Husky™ 716 all plastic diaphragm pump is released for fluid transfer applications..

2002

Graco introduces its first Reactor® Proportioner for applying 2-component foams, polyurea and epoxies.

2010

Graco introduces the G3™ Electric Grease Pump with industry changing capabilities.

2012

Graco introduces the XM™ PFP to apply epoxy passive fire protection coatings to protect steel from hydrocarbon fires.

2014

Oil and Natural Gas Division established to meet customer demands. Graco acquires the Alco Valves Group.

2015

Graco acquires High Pressure Equipment (HIP) company.

- Electric Chemical Injection Pumps
- Hazardous Location Pumps
- Variable Speed Pumps
- Chemical Management Solutions
- Pump Controllers
- Remote Communication
- Pneumatic Chemical Injection Pumps
- Electric Low Pressure Metering Pump
- Drive and Fluid Modules

G-Chem™ Electric Operated Pumps and Systems

Entry Level Chemical Pumps and Systems

The G-Chem series pumps are ideal for chemical injection applications. Built from the same quality standards as current Graco chemical injection pumps, the G-Chem pump has the lowest out-of-pocket cost of Graco electric chemical injection pumps, is easy to operate and far exceed the performance of similar pumps of its class. The DC operated pumps are also offered in solar system packages that come with a 100 watt solar panel and the new Harrier® EZ controller as the standard product offering.

Ease of serviceability

- Easy access to the pump plunger and packings
- Plunger packings can be replaced in 10 minutes or less
- Three defined stroke adjustment positions

Harrier EZ timer

- Preset built-in low voltage disconnect
- Voltage reading and display
- Prime mode
- Built-in On/Off switch

Robust and simple design

- Adjustable fluid packing lasts longer than non-adjustable seals
- G-Chem pumps are offered with Chromex™ coated plungers
- SST fluid section/wetted parts
- Proprietary poppet style check valve prevents valve from sticking
- Same high quality drive train used on other Graco chemical injection pumps

G-Chem™ Electric Operated Pumps and Systems

Modular Chemical Injection Systems

VDC and VAC Powered Systems

Build Your Chemical Injector System

Build Your System in 4 Easy Steps!

1 Select Your Pump

Select based on your pressure and flow requirements as well as seal material:

- Pressures: 0-10,000 psi (689 bar, 68.9 MPa)
- Flow: 0-40 gpd (151.4 lpd)
- Seal material will depend on your chemical handling requirements
- Power: DC Solar or AC

2 Configure Your Control Box

Select based on your control requirements:

- Harrier® EZ: Basic time based control
- Harrier: Time and cycle based control with auxiliary switch for DC power
- Harrier+: Adaptive flow assurance, remote pump control and automation
(Class 1, Division 2 certified for Hazardous Location)
- Single, dual and multi-battery control box options
- Solar charge controllers options will be based on power consumption and required features
- Power: DC Solar or AC

3 Pick Your Solar Panel

Solar panels for General Purpose locations:

- 50 W, 100 W, 160 W or 265 W (24 VDC)

Solar panels for Hazard Locations (C1D2):

- 50 W, 90 W, 120 W (24 VDC) or 150 W

4 Pick Your Power Stand

Select your solar panel stand based on application requirements:

- Three foot pole and stand
- Six foot pole and stand
- A-frame stand
(100 W panel only)
- AC Power Stand

Modular Control Box Option

VDC and VAC Powered Systems

When specifying the correct chemical injection system, choosing the correct control box configuration can be very critical in ensuring proper system operation. The box options below help meet all chemical injection application requirements.

One-Battery Control Box

One-Battery Plastic Box

Part #: B5210X

- For DC power
- Houses a Harrier® EZ controller
- Separate tray for controller and charge controller
- Lockable box
- Comes standard with G-Chem™ solar systems

One-Battery Metal Box

Part #: B5215X

- For DC power only
- Painted steel construction
- Lockable slide lid
- Configured for a pole mount
- Comes standard with G-Chem™ solar systems

Two-Battery Control Box

Two-Battery Metal Box

Part #: B522XX

- For DC power only
- Houses up to two batteries
- Aluminum construction
- Lockable slide lid
- Configured for a pole mount
- Includes box and sub-plate

Two-Battery Metal Box Sub-Plate

- Removable sub-plate for easy battery access and ease of serviceability
- Keeps electric components and battery separate
- Sub-plates are configurable with all controller and charge controller options
- On/Off switch

NEMA Rated Control Boxes

NEMA Rated AC Box

Part #: B52AXX

- NEMA 4 rated box
- Conforms to UL-508A and CSA 22.2 No. 14 & 73
- For AC power only
- Houses the Harrier+ controller
- Painted steel construction
- Lockout/Tagout disconnect
- Configured for a pole mount

NEMA Rated DC Box

Part #: B52NXX

- NEMA 4X rated box
- For DC power only
- Separate battery box that holds up to two batteries (Part #: B32808)
- UV resistant polycarbonate construction (UL-5VA rated)
- Lockable hinged door
- Configured for a pole mount
- Additional dual battery boxes can be linked (Part #: B32809)
- On/Off switch

Four-Battery Control Boxes

Four-Battery Plastic Box

Part #: B32805

- For DC power only
- Houses up to four batteries
- Lockable hinged lid
- Removable sub-plate for easy battery access and ease of serviceability
- Plastic box only

Four-Battery Plastic Box Sub-Plate

Part #: B524XX

- Removable sub-plate for easy battery access and ease of serviceability
- Keeps electric components and battery separate
- Sub-plates are configurable with all controller and charge controller options
- On/Off switch

Note: Plastic box sold separate. Graco PN B32805, uses Contico PN3725NL

Modular Control Boxes

VDC and VAC Powered Control Boxes

Ordering Information

Selecting the right control box will depend on the box type, voltage, pump controller, and if applicable, charge controller and number of solar panels required. The tables below summarize all of the control box options available for your chemical injection application.

One-Battery Control Box Options			
	Charge Controller/ Controller	No Controller	Harrier EZ

Weight	
2-Battery Aluminum Box (without battery)	21.5 lb (9.75 kg)
4-Battery Back Panel	8.0 lb (3.6 kg)
NEMA Control Box	16.9 lb (7.67 kg)

Harrier® Electronic Injection Rate Controllers

Features and Benefits

Closely control and monitor chemical use and collect critical operating information for reducing costs and improving processes. Its easy, efficient and productive – saving you time and money.

Accurate Control

Simple user interface for setup and control. Enter your desired injection rate and let Graco do the rest!

Office or Remote Access

The Harrier+ controller includes remote connectivity, allowing you to monitor, control and calibrate your system away from your injection site via cellular or ModBus.

Notifications

Easily monitors your system for control, troubleshooting, maintenance needs and alerts.

Minimize Waste

Patent pending adaptive flow control technology maintains a consistent injection rate, regardless of system variables, reducing waste and costs.

System Control

Multiple inputs for system controls allow you to only run when it's necessary.

Choose the model that fits your needs:

Harrier Controller
with Cycle Count
Capability
B32001

Harrier EZ, Harrier and Harrier AC

- Harrier EZ and Harrier used for DC pumps and Harrier AC used for AC pumps
- Control injection rates via timer or cycle count
- ETL listed for electrical safety: UL 508 and CSA 22.2 No. 14

Harrier+

- Used for AC and DC pumps
- Control injection rates via timer, cycle count or flow control
- Easy to read display that operates at temperatures as low as -40° F (-40° C)
- Cellular connectivity for U.S. and global networks
- ETL listed for electrical safety: UL 508 and CSA 22.2 No. 14
- Class 1, Division 2 certified for Hazardous Location.

Tank Level Monitoring Solution

Features and Benefits

The Graco tank level monitor and Harrier+ combination puts tank and chemical injection information at the user's fingertip, whether on-site or 1000 miles away. Not only can you monitor your chemical usage but you can also ensure proper pump operation and verification.

How does Graco's tank level monitoring work?

The tank level sensor is a pressure transducer that connects directly into the chemical tank. The pressure is then converted to an analog signal which the Harrier+ controller correlates to a tank level. The data collected by the controller can then be tracked and manipulated via its controller portal or a connected SCADA system.

Chemical Monitoring

Ensure your chemical tank has an adequate chemical supply with real-time monitoring of your chemical tank level.

Flow Verification

If your chemical tank level and total pump volumes do not match up within a given threshold, the Harrier+ controller will trigger an alarm.

Accurate

Once your chemical injection system is setup and properly calibrated, industry leading accuracy readings can be achieved.

Tank Selection Methods

Whether you have a uniform or a custom chemical tank, the Harrier+ controller can be setup to handle any shape tank.

Harrier+ Web Portal

The Harrier+ Web Portal provides 24/7 critical well site data such as local chemical inventory information for connected chemical tanks.

Wolverine® DC and AC Series Pumps

Features and Benefits

Wolverine chemical injection pumps reduce emissions to the atmosphere and have a greater level of control when used with our injection rate controllers. These injection pumps are designed for up to two years of operation before simple repairs. Each pump features an adjustable fluid packing that lasts up to 25 times longer than non-adjustable seals.

Operating Environment

The Wolverine is designed to operate in environments from -40° F to 175° F (-40° C to 79° C). They have 316 SST wetted parts, plus they're sealed against water and dust.

Pump Capabilities

Flow rates up to 392 gpd (1,484 lpd) and a pressure rating up to 10,000 psi (686 bar, 68.9 MPa).

Save Time

Easily replace pump seals in less than 10 minutes, on location.

Accurate Control

Precision stroke adjustment between 1/2 in to 1 in (12.7 mm to 25.4 mm) ensures accurate injection rates.

Chemical Compatibility

HNBR, FKM, FKM-ETP, FFKM, and TFE/P plunger packings and check valve seals can handle some of the most aggressive chemicals.

Save Power

Low friction drivetrain to optimize electrical efficiency, reducing the load on your power system.

Configurations

Fluid Plunger Sizes

- 1/8 in (3.18 mm)
- 3/16 in (4.76 mm)
- 1/4 in (6.35 mm)
- 3/8 in (9.5 mm)
- 1/2 in (12.7 mm)
- 5/8 in (15.9 mm)
- 3/4 in (19.1 mm)

Input Power Types

- 12 VDC
- 115 VAC Single Phase
- 115/230 VAC Single Phase
- 230 VAC Single Phase
- 230/460 VAC 3-Phase

Frequency

- Fixed Speed
- Variable Speed

Wolverine® Variable Speed Pumps

Features and Benefits

Pump

The variable speed Wolverine pump provides continuous injection for an even dispersion of chemicals. Flow rates are adjusted between 0-100% by a control dial on the motor eliminating the need for a localized controllers. The fluid heads are interchangeable between all Wolverine series pumps.

Modules

The variable speed pumps are also offered as fluid and drive modules. Part numbers can be found in the Drive Module and Fluid Module sections starting on page 60.

Motor

High efficiency 12 or 24VDC brushless motors use less amperage draw than transitional brushed VDC motos. This helps eliminate the need for extra batteries and solar panels in solar powered chemical injection systems. The DC motors are rated for use in Hazardous (Classified) Locations. The AC motors are rated for ordinary location.*

Accurate Control

Precision stroke adjustment between 1/4 in to 1 in (6.4 mm to 25.4 mm) ensures accurate injection rates.

Chemical Compatibility

HNBR, FKM, FKM-ETP, FFKM, and TFE/P plunger packings and check valve seals can handle some of the most aggressive chemicals.

Standards

The DC operated motors are rated for use in Division 2 Hazardous (Classified) Locations per the following standards.

Class I, Group A & B,
Class II, Group C & D

Class I, Group A & B,
Class II, Group C & D

Wolverine® Hazardous Location DC and AC Series Pumps

Features and Benefits

Operating Environment

The Wolverine Hazardous Location pumps are designed to operate in applications requiring Class 1, Division 1, rated products. They have 316 SST wetted parts, plus they're resistant against water and dust.

Pump Capabilities

Flow rates up to 320 gpd (1,211 lpd) and a pressure rating up to 10,000 psi (686 bar).

Save Time

Easily replace pump seals in less than 10 minutes, on location.

Accurate Control

Precision stroke adjustment between 1/2 in to 1 in (12.7 mm to 25.4 mm) ensures accurate injection rates.

Chemical Compatibility

HNBR, FKM, FKM-ETP, FFKM, and TFE/P plunger packings and check valve seals can handle some of the most aggressive chemicals.

Standards

The AC and DC operated motors are rated for use in Division 1 Hazardous (Classified) Locations per the following standards.

Class I, Group C & D,
Class II, Group F & G

All Advanced Wolverine Pumps can be purchased with a cycle counter installed.

The model number of a pump with a cycle counter installed begins with "A29" rather than "A26."

Mongoose™ Electronic Low Pressure Chemical Metering Pump

Our Mongoose series metering pump is suitable for dispensing chemicals for a variety of diverse markets such as oil and natural gas, mining, agriculture, landscaping and lawn maintenance, waste water, and car wash. These pumps can also be used in chemical dosing maintenance applications including cooling towers, boilers, and plating, as well as a multitude of other uses.

Graco check valves

- Proprietary design (SST Head)
- Poppet style eliminates valve from sticking
- Same style valve used on other Graco chemical pumps

Overload protection

- Self resetting thermal overload prevents over heating
- Over current protection
- Easily replaceable fuse for overcurrent
- No longer a throwaway pump

Prime/air bleed port

- No need to remove fluid section to prime pump
- Quick and easy priming

Other features

- Manual stroke adjustment
- Splash cover over controls
- NEMA 4x style enclosure
- UL and CSA certified

Mongoose™ Electronic Low Pressure Chemical Metering Pump

Technical Data

Mongoose Chemical Metering Pump	
Maximum fluid working pressure	250 psi (17.2 bar)
Cycle rate	125 cpm - 145 cpm
Input Voltage	120 VAC, 240 VAC, 12 VDC
Amperage Max Load	0.1 A - 0.5 A
Frequency	50/60 Hz
Environmental temperature range	-40° F to 120° F (-40° C to 50° C)
Inlet/Outlet Sizes	
Fluid inlet size	1/4 in npt, 1/4 in tube, 3/8 in tube
Fluid outlet size (1/4 in plungers only)	1/4 in npt, 1/4 in tube, 3/8 in tube
Prime/bleed size (1/4 in plungers only)	1/16 in npt, tube connection
Wetted Parts	
Pump/Diaphragm Seal Material	PEEK and PTFE unless otherwise noted
Other	316 stainless steel or PVDF
Check Valve Seal Material	FFKM or FKM
Weight	
All models	9.0 lb to 10.0 lb (4.0 kg to 4.5 kg)

Dimensions

Configuration Number Matrix

Check the identification plate (ID) for the 11-digit Configuration Number of your pump. Use the following matrix to define the components of your pump. *NOTE: Not all combinations are possible.*

Sample Configuration Number: **LCI-1A15-SPD-0**

LCI	1A	15	S	P	D	0
Low Pressure Chemical Injection	Voltage	Pump Performance	Pump Material	Diaphragm Material	Check Valve Seal Material	Options

Voltage		Pump Performance		Pump Material		Diaphragm Material		Check Valve Seal Material		Options	
12	12 VOC	10	10 gpd (37.8 lpd) 140 psi (9.6 bar)	S	316 SST	P	PTFE Coated	D	FFKM	0	None
1A	120 VAC	15	15 gpd (56.7 lpd) 150 psi (10.3 bar)	K	PVDF			A	FKM	1	No Bleed Valve, Standard Check
2A	240 VAC	17	17 gpd (64.3 lpd) 250 psi (17.2 bar)								
		30	30 gpd (113.5 lpd) 110 psi (7.5 bar)								
		45	45 gpd (170.3 lpd) 75 psi (5.2 bar)								

Python® Pneumatically Operated Pumps

Features and Benefits

Python pumps are ideal for applications that require a pump to operate in an potentially explosive atmosphere and can run off regulated natural gas or compressed air. These pumps have the lowest out of pocket cost, are easy to operate and use half the air consumption of other pumps in the market. Plus, the Python's extreme duty plungers, seals and timing valve are designed for years of operation before replacement.

Operating Environment

The Python is designed to operate in environments from -40°F to 175°F (-40°C to 79°C), made entirely from 316 SST parts and are sealed against water and dust.

Accurate Control

Ultra precision stroke adjustment between 1/4 to 1 inch (6.4 to 25.4 mm) ensures accurate injection rates.

Environmental

Reduced fugitive methane emissions.

Chemical Compatibility

HNBR, FKM, FKM ETP, FFKM, and TFE/P plunger packings and check valve seals can handle some of the most aggressive chemicals.

Consistent Operation

Pump cycle rate remains constant regardless of system back pressure.

Plunger Rod

Pythons are offered with Chromex coated plungers as the standard product offering. Ceramic coated plungers are also offered as an option. See page 70 for more information regarding benefits of Chromex and Ceramic plunger rod coatings.

Standards

CE and ATEX approved.

Configurations

Fluid Plunger Sizes	Fluid Plunger Material	Input Power	Standards
• 1/8 in (3.18 mm) • 3/16 in (4.76 mm) • 1/4 in (6.35 mm) • 3/8 in (9.5 mm) • 1/2 in (12.7 mm) • 5/8 in (15.9 mm) • 3/4 in (19.1 mm)	• Chromex Coated • Ceramic Coated	• Compressed air or natural gas • Max 200 psi (13.8 bar, 1.38 MPa)	• ATEX • CE
	Air Motor Size • 1-1/4 in (31.8 mm) • 1-3/4 in (44.5 mm) • 2 in (50.8 mm)	Pump Capabilities • Max flow rate: 165 gpd (625 lpd) • Max pressure: 12,000 psi (827 bar, 82.7 MPa) • Max cycle rate: 60 cycles/min	

Python® Pneumatically Operated Pumps

(continued)

Technical Data

Python Chemical Injection Pump	
Maximum air inlet pressure	see instruction manual
Maximum fluid working pressure	see instruction manual
Environmental temperature range	-40° F to 176° F (-40° C to 80° C)
Noise (dBa)	
Maximum sound pressure	<70 dBa with included muffler installed
Inlet/Outlet Sizes	
Fluid inlet size	1/4 in npt (f) (1/4 npt (m) adapter included)
Fluid outlet size (1/4 in, 3/8 in, 1/2 in, 5/8 in, and 3/4 in plungers only)	1/4 in npt (f)
Fluid outlet size (1/8 in and 3/16 in plungers only)	HiP HF4
Prime/bleed size (1/4 in, 3/8 in, 1/2 in, 5/8 in, and 3/4 in plungers only)	10-32 UNF
Prime/bleed size (1/8 in and 3/16 in plungers only)	1/16 in npt (f)
Pneumatic inlet size	1/8 in npt (f) (1/4 in npt (f) adapter included)
Pneumatic outlet size (exhaust recovery)	1/8 in npt (f)
Materials of Construction	
Pump/Check Valve seal material	See Configuration Number Matrix below for seal material.
Wetted Parts	See Configuration Number Matrix below for seal material. All other materials are 316 stainless steel unless otherwise noted.
Weight	
All models	8-11 lb (3.6-4.9 kg)

Dimensions

A	B	C	D	E
13.26 in (33.7 cm)	5.3 in (13.5 cm)	2.34 in (5.9 cm)	2.3 in (5.8 cm)	9.125 in (23.2 cm)

Python® Pneumatically Operated Pumps

Configuration Number Matrix

Graco provides a configuration numbering matrix to identify its pump's various configurations. Use the following matrix to define the components applicable to your needs.

NOTE: Not all possible configurations are available.

Sample Configuration Number: PCI-125-19S-XA-A

PCI	125	19	S	S	A	0
Pneumatic Chemical Injection	Air Motor Size	Plunger Size	Pressure Range	Plunger Material	Seal Material	Qualifier

Air Motor Size		Plunger Size (diameter)		Pressure Range		Plunger Material		Seal Material		Qualifier	
125	1-1/4 in	13	1/8 in	S	Standard Pressure (1/4 in, 3/8 in, 1/2 in, 5/8 in, 3/4 in plungers)	X	Chromex Coated 17-4 PH Stainless	A	FKM	A	ATEX
175	1-3/4 in	19	3/16 in	H	High Pressure (1/8 in & 3/16 in plungers)	C	Ceramic Coated 17-4 PH Stainless	B	FKMETP	U	U-Cup Air Piston
200	2 in	25	1/4 in					C	HNBR		
		38	3/8 in					D	FFKM		
		50	1/2 in					E	TFE/P		
		63	5/8 in								
		75	3/4 in								

Key Points

- Standard pressure pumps feature 1/4 in npt (f) inlet and outlet connections.
- High pressure pumps feature 1/4 in npt (f) inlet and HiP HF4 outlet connections.
- B32240 can be used to convert HF4 outlet connection to 1/4 in npt (f) for applications 10,000 psi and under.

Python® Pneumatically Operated Pumps (continued)

Python® XL Pneumatically Operated Pumps

Python XL series pumps are ideal for wells with low gas pressure. Capable of operating up to 12,000 psi, the pumps are easy to operate and include an air motor with the same proven technology that Graco offers in other product lines. Plus the Python XL's extreme duty plungers (Chromex™ and ceramic coated), seals and air valves are designed for years of operation before replacement.

Ease of serviceability

- Modular air valve design
- Removable pilot valve
- Pump lowers are interchangeable with other Python XL models
- Plunger packings can be replaced in 10 minutes or less

Highest technology air motor on the market

- Only requires a minimum of 15 psi to operate pump
- Low air/gas consumption for increased efficiency
- Muffler provides low operation noise levels
- Proven Graco® Merkur® air motor technology

Robust and simple design

- 316 SST fluid section/wetted parts
- Three stroke adjustment positions
- HNBR, FKM, FKM ETP, FFKM, and TFE/P plunger packings and check valve seals

Environmentally friendly

- 97% recoverable exhaust gas
- Reduced fugitive methane emissions

Technical Data

Python XL Chemical Injection Pump	
Minimum pneumatic inlet pressure	See Instruction Manual
Maximum fluid working pressure	See Instruction Manual
Maximum cycle rate	100 cpm
Environmental temperature range	-40° F to 176°F (-40° C to 80°C)
Noise (dBa)	
2-1/2 in Air Motor Sound Power	83.2 dBA
2-1/2 in Air Motor Sound Pressure	76.5 dBA
3-1/2 in Air Motor Sound Power	84.5 dBA
3-1/2 in Air Motor Sound Pressure	77.9 dBA
4-1/2 in Air Motor Sound Power	80.1 dBA
4-1/2 in Air Motor Sound Pressure	70.2 dBA
Inlet/Outlet Sizes	
Fluid inlet size	1/4 in npt (f)
Fluid outlet size (3/8 in, 1/2 in, 5/8 in, & 3/4 in plungers only)	1/4 in npt (f)
Fluid outlet size (1/4 in plungers only)	HiP HF4
Prime/bleed size (3/8 in, 1/2 in, 5/8 in, & 3/4 in plungers only)	10-32 UNF
Prime/bleed size (1/4 in plungers only)	1/16 in npt (f)
Pneumatic inlet size	1/4 in npt (f)
Exhaust fitting size	3/8 in npt (f)
Materials of Construction	
Pump/Check Valve Seal Material	See Configuration Chart in manual for seal material. All other packing materials are PEEK and PTFE unless otherwise noted.
Wetted Parts	See Configuration Chart in manual for plunger material. All other materials are 316 stainless steel unless otherwise noted.
Weight	
2-1/2 in (ALL MODELS)	14.5 lb (6.6 kg)
3-1/2 in (ALL MODELS)	20.0 lb (9.1 kg)
4-1/2 in (ALL MODELS)	29.0 lb (13.2 kg)

Python® XL Pneumatically Operated Pumps

Configuration Number Matrix

Configuration Number Matrix

Check the identification plate (ID) for the 12-digit Configuration Number of your pump. Use the following matrix to define the components of your pump. *NOTE: Not all combinations are possible.*

Sample Configuration Number: **PCI-350-25S-XA-0**

PCI	350	25	S	X	A	0
Pneumatic Chemical Injection	Pneumatic Motor Size	Plunger Size	Pressure Range	Plunger Material	Seal Material	Qualifier

Pneumatic Motor Size		Plunger Size (diameter)		Outlet Connection Type		Plunger Material		Seal Material		Qualifier	
250	2-1/2 in	13	1/4 in	S	1/4 in npt (f)	X	Chromex	A	FKM	0	None
350	3-1/2 in	19	1/4 in	H	HiP HF4	C	Ceramic	B	FKMETP		
350	4-1/2 in	25	1/4 in					C	HNBR		
		38	3/8 in					D	FFKM		
		50	1/2 in					E	TFE/P		
		63	5/8 in								
		75	3/4 in								

Key Points

- All pumps feature 1/4 in npt (f) inlet connections.
- Kit B32240 can be used to convert an HF4 outlet connection to a 1/4 in npt (f) for applications at or under 10,000 psi.

Python XL Inlet and Outlet Check Valve Repair Kits

Part Number	Description
B32038	FKM Large (3/8 in.-3/4 in.) Inlet and Outlet Check Valve Repair Kit (includes a spring and piston o-rings)
B32039	FKM ETP Large (3/8 in.-3/4 in.) Inlet and Outlet Check Valve Repair Kit (includes a spring and piston o-rings)
B32040	FFKM Large (3/8 in.-3/4 in.) Inlet and Outlet Check Valve Repair Kit (includes a spring and piston o-rings)
B32111	HNBR Large (3/8 in.-3/4 in.) Inlet and Outlet Check Valve Repair Kit (includes a spring and piston o-rings)
B32608	Aflas Large (3/8 in - 3/4 in) Outlet Check Valve Kit
B32610	Aflas Large (3/8 in - 3/4 in) Inlet Check Valve Kit
B32087	Aflas Small (1/4 in) Outlet Check Valve Kit
B32092	Aflas Small (1/4 in) Inlet Check Valve Kit
B32806	Aflas High Pressure (1/16 in) Inlet Check Valve Kit
B32807	Aflas High Pressure (1/16 in) Outlet Check Valve Kit
B32224	FKM Small (1/4 in.) Inlet and Outlet Check Valve Repair Kit (includes a spring and piston o-rings)
B32225	FKM ETP Small (1/4 in.) Inlet and Outlet Check Valve Repair Kit (includes a spring and piston o-rings)
B32235	FFKM Small (1/4 in.) Inlet and Outlet Check Valve Repair Kit (includes a spring and piston o-rings)
B32234	HNBR Small (1/4 in.) Inlet and Outlet Check Valve Repair Kit (includes a spring and piston o-rings)

Python XL Pressure Relief Valves

Part Number	Description
B32045	225-750 psi Pressure Relief Valve Kit (Adjustable)
B32046	750-1,500 psi Pressure Relief Valve Kit (Adjustable)
B32047	1,500-2,250 psi Pressure Relief Valve Kit (Adjustable)
B32048	2,250-3,000 psi Pressure Relief Valve Kit (Adjustable)
B32049	3,000-4,000 psi Pressure Relief Valve Kit (Adjustable)
B32050	4,000-5,000 psi Pressure Relief Valve Kit (Adjustable)
B32051	5,000-6,000 psi Pressure Relief Valve Kit (Adjustable)

Other Python XL Kits

Part Number	Description
B32088	SST Calibration Column Kit
B32089	SST Manifold Assembly Kit
B32157	316 SST Ball Valve Kit, 3/4 in. npt(f)
B32158	Fluid Filter 6,000 psi
B32159	Fluid Filter 10,000 psi
B32160	Float Switch
B32162	1/4 in. npt(f) x 1/4 in. npt(f) Check Kit
B32240	HF4 to 1/4 in. Adapter; 10,000 psi (1/8 in.-3/16 in. plungers)
B32268	Dowel Pin/Split Ring, Stainless Steel
B32767	Dust/Hand Guard, 2.5 in
B32271	Dust/Hand Guard, 3.5 in
B32277	Dust/Hand Guard, 4.5 in
B32274	Stand Leg Kit

Accessories and Kits

Chemical Injection accessories and kits are durable components designed to operate in extreme conditions.

Features and Benefits of some of the many accessories and kits offered.

Solar Panels

Available in 90 W, 120 W, 150 W, 160 W and 265 W sizes, with or without Class 1, Division 2 certification. All panels include quick release MC4 connectors.

Tank Mount Kits

Contains all the necessary hardware to build a tank mounted chemical injection skid, including: calibration column, fluid manifold, y-strainer, pressure relief valve, and line check valve.

Batteries

Two versions of deep cycle batteries: economy lead acid – 96 Ah capacity & premium AGM – 105 Ah capacity. The AGM battery is recommended for installations in extreme temperatures.

Charge Controller

Charge controllers improve battery life by tracking a battery's state of charge and adjusting charging voltage accordingly.

Electrical Enclosure

Metal enclosure to protect the battery, charge controller and injection rate controller from the environment.

Pressure Relief Valve

Available in pressures from 225 psi to 6,000 psi.

3/8 in Chromex
B32062

1/2 in Ceramic Coated
B32135

Chromex provides a much harder wear surface and is not porous like hard chrome. The result is longer intervals before rod or packing replacement is required, especially with abrasive or hard particle materials. The Chromex coating meets or exceeds the chemical compatibility and corrosion resistance of hard chrome.

Chromex is superior to Ceramic coatings with regards to seal life. Ceramic coatings result in long life rods and cylinders but the packings tend to wear out much faster, resulting in more frequent maintenance intervals. Some special applications may still benefit from the Ceramic coatings.

FKM Outlet and Inlet
Check Valve Replacements
B32025 and B32024

Pressure Relief Valve
750-1,500 psi
B32046

Replacement Fluid Section,
3/8 in FKM, Stainless
B32079

Replacement Fluid Section,
1/2 in HNBR, Stainless
B32467

G-Chem™ Pump Parts and Kits

G-Chem Other Kits	
B32002	12 VDC G-Chem Motor Replacement Kit
B32733	FKM Inlet Check Valve, 1/4 in npt
B32734	FKM Outlet Check Valve, 1/4 in npt
B32735	HNBR Inlet Check Valve, 1/4 in npt
B32736	HNBR Outlet Check Valve, 1/4 in npt
B32739	A-Frame Solar Panel Bracket
B32761	115 VAC G-Chem Motor Replacement Kit
B32776	1/4 in G-Chem Packing Nut
B32775	3/8 in G-Chem Packing Nut
B32774	1/2 in G-Chem Packing Nut
B32779	1/4 in G-Chem Plunger
B32778	3/8 in G-Chem Plunger
B32777	1/2 in G-Chem Plunger
B32784	1/4 in G-Chem FKM Plunger Packing Seals
B32785	1/4 in G-Chem HNBR Plunger Packing Seals
B32782	3/8 in G-Chem FKM Plunger Packing Seals
B32783	3/8 in G-Chem HNBR Plunger Packing Seals
B32780	1/2 in G-Chem FKM Plunger Packing Seals
B32781	1/2 in G-Chem HNBR Plunger Packing Seals
B32798	G-Chem Simplex to Duplex Conversion Kit
B32799	1/4 in G-Chem FKM Seal Conversion Kit
B32800	1/4 in G-Chem HNBR Seal Conversion Kit
B32801	3/8 in G-Chem FKM Seal Conversion Kit
B32802	3/8 in G-Chem HNBR Seal Conversion Kit
B32803	1/2 in G-Chem FKM Seal Conversion Kit
B32804	1/2 in G-Chem HNBR Seal Conversion Kit
B52152	Harrier EZ One-Battery Metal Control Box
B32696	Kit, Mount, Controller, Harrier AC
B32811	Harrier AC Mounting Bracket for G-Chem

Python® Pump Kits (continued)

Fluid Plunger Replacement Kit (1)

B32139	1/8 in Chromex Coated Fluid Plunger Replacement Kit
B32140	3/16 in Chromex Coated Fluid Plunger Replacement Kit
B32141	1/4 in Chromex Coated Fluid Plunger Replacement Kit
B32142	3/8 in Chromex Coated Fluid Plunger Replacement Kit
B32143	1/2 in Chromex Coated Fluid Plunger Replacement Kit
B32144	5/8 in Chromex Coated Fluid Plunger Replacement Kit
B32145	3/4 in Chromex Coated Fluid Plunger Replacement Kit
B32241	1/8 in Ceramic Coated Fluid Plunger Replacement Kit
B32242	3/16 in Ceramic Coated Fluid Plunger Replacement Kit
B32243	1/4 in Ceramic Coated Fluid Plunger Replacement Kit
B32244	3/8 in Ceramic Coated Fluid Plunger Replacement Kit
B32245	1/2 in Ceramic Coated Fluid Plunger Replacement Kit
B32246	5/8 in Ceramic Coated Fluid Plunger Replacement Kit
B32247	3/4 in Ceramic Coated Fluid Plunger Replacement Kit

Fluid Cylinder Replacement Kit (2)

B32180	1/8 in Fluid Cylinder Replacement Kit
B32181	3/16 in Fluid Cylinder Replacement Kit
B32182	1/4 in Fluid Cylinder Replacement Kit
B32183	3/8 in Fluid Cylinder Replacement Kit
B32184	1/2 in Fluid Cylinder Replacement Kit
B32185	5/8 in Fluid Cylinder Replacement Kit
B32186	3/4 in Fluid Cylinder Replacement Kit

Ordering Information

Python® Pump Kits (continued)

Timing Valve Kits (4)

B32193	Timing Valve Lower Housing Replacement Kit (4a)
B32194	Timing Valve Upper Housing Replacement Kit (4b)
B32195	Timing Valve Fastener Replacement Kit
B32196	Timing Valve Spring Retainer Replacement Kit
B32197	Timing Valve Return Spring Replacement Kit
B32198	Timing Valve Pipe Fitting Kit
B32199	Timing Valve Needle Replacement Kit
B32069	Standard Timing Valve Replacement Kit
B32153	Standard Timing Valve Rebuild Kit

Fluid Plunger Packing Nut Kit

B32187	1/8 in-1/4 in Fluid Plunger Packing Nut Kit
B32188	3/8 in Fluid Plunger Packing Nut Kit
B32190	5/8 in-3/4 in Fluid Plunger Packing Nut Kit
B32203	1/2 in Fluid Plunger Packing Nut Kit

Air Piston Seal Kits (5)

B32034	1-1/4 in Air Piston Seal Replacement Kit
B32035	1-3/4 in Air Piston Seal Replacement Kit
B32036	2 in Air Piston Seal Replacement Kit
B32172	1-1/4 in Air Piston Replacement Kit
B32173	1-3/4 in Air Piston Replacement Kit
B32174	2 in Air Piston Replacement Kit
B32165	Small Air Piston Stop Replacement Kit
B32166	Large Air Piston Stop Replacement Kit

Accessories and Kits

Python® Pump Kits (continued)

Other Python Kits	
B32162	1/4 in npt (f) X 1/4 in npt (f) Check Kit
B32163	Small Air Motor Housing Replacement Kit
B32164	Large Air Motor Housing Replacement Kit
B32175	Air Cylinder Set Screw Replacement Kit
B32176	Small Dust Cover Seal Replacement Kit
B32177	Large Dust Cover Seal Replacement Kit
B32178	Small Dust Cover Replacement Kit
B32179	Large Dust Cover Replacement Kit
B32191	Bleed Assembly Replacement Kit
B32192	Stroke Adjust Assembly Replacement Kit
B32240	1/8 in and 3/16 in HF4 High Pressure to 1/4 in npt Adapter Kit
B32250	1/8 in and 3/16 in High Pressure Bleed Needle Replacement Kit
B32205	Air Cylinder Kit, 1-1/4 in Air Motor
B32206	Air Cylinder Kit, 1-3/4 in Air Motor
B32207	Air Cylinder Kit, 2.00 in Air Motor
B32204	Bleed Valve Kit

Graco's got you covered

Facilities Worldwide for Global Support

Quality First

At Graco we pride ourselves on providing best-in-class products. Engineered solutions are manufactured in our own facilities, with the highest standards in the industry. We provide you with world-class customer support and expertise to help solve your lubrication challenges.

Global Reach

Graco has facilities across the globe to provide you with the products and service *you* need, where *you* live. Plus, Graco has dedicated field experts in all areas of the world to support the products we sell.

Product Capabilities

Graco has a broad range of products to provide solutions that meet your needs. Our products are engineered and tested to perform in the harshest environments so you can be certain your equipment is protected and working at peak performance.
