Den Hartog
INDUSTRIES, INC.

"ALWAYS AT YOUR SERVICE"

Since 1976, Den Hartog Industries has been committed to providing quality products and innovative, industry-leading service solutions with integrity.

Our history is your success.

Den Hartog Industries, Inc. features four manufacturing divisions:

ACE ROTO-MOLD ROTATIONAL MOLDING

Ace Roto-Mold tanks and marine products are well known for high quality, rotationally molded products and accessories. Ace Roto-Mold is a leader in the industrial and agricultural container markets, the marine industry and custom molding.

BLOW MOLDING

The Blow Molding Division can efficiently produce high quality products at a low part cost. This method of molding can produce large volumes of detailed plastic parts.

INJECTION MOLDING

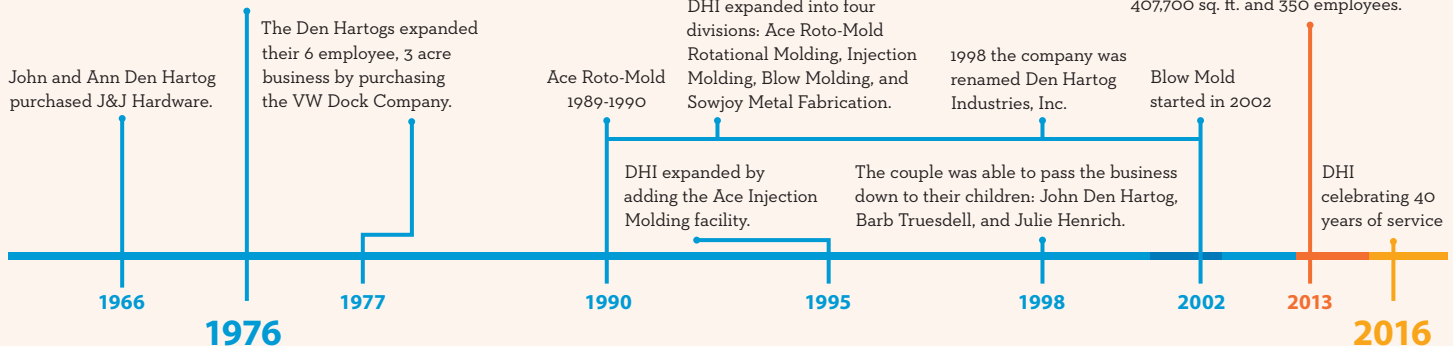

The Injection Division has the ability to take your project from concept to reality with complete, in-house services such as packaging, printing and assembly.

SOWJOY METAL FABRICATION

A wide range of capabilities allows this division to produce various custom projects. Known for its line of hog confinement systems, this division provides metal products to the Ace Roto-Mold line.

Den Hartogs purchased H&S Manufacturing

TRANSPORTATION

Manufacturing high-quality tanks for industrial and agricultural needs is just part of the job. Den Hartog Industries delivers—literally. Our company-owned and operated fleet will deliver your order promptly and conveniently to your business or work site. Our custom fleet of trucks and trailers reduces transportation costs while increasing responsiveness and convenience to our customers. The Den Hartog transportation service is one more way we live up to our motto, "Always At Your Service."

APPLICATION GUIDELINES

A booklet containing additional information on tank selection and application, chemical resistance, materials information, tank drawings, handling, installation and use guidelines, fitting installation guidelines, and general customer information is available upon request. Application Guidelines are also available online at www.denhartogindustries.com/application-guidelines.

CHEMICAL COMPATIBILITY

Always verify your chemical compatibility with tanks, fittings, and gaskets. Consult your chemical manufacturer regarding applications.

Round Horizontal Tanks

Round Tanks are selected when transportable (non DOT regulated) containment is required for indoor or outdoor applications. Tanks require skids and bands to support the round bottom. All tanks are equipped with drain out sumps.

Tanks are manufactured from medium-density polyethylene with UV inhibitors and designed for containment of liquids of up to 1.7 specific gravity. Tank walls are translucent for level viewing and equipped with gallon indicators.

Elliptical Tanks

Elliptical Tanks can be selected for stationary or transportable (non DOT regulated) applications both indoors and outdoors. The elliptical tank lowers the center of gravity to enhance stability and visibility. The tanks feature a standard 2 1/2" collection sump on the bottom for full drain out. An 8 1/2" deep sump option is available in six sizes. Sump is located directly under the lid on standard tanks, but a center sump option is available on tanks from 500-1250 gallons. These tanks require the bottom to be fully supported with a cradle for use. The tanks are manufactured from medium-density polyethylene with UV stabilizers and are designed for containment of liquids of up to 1.7 specific gravity. Tank walls are translucent for level viewing and equipped with gallon indicators.

Drain Options — Available on 500–1,250 gallon tanks

Batch Tanks are designed for indoor applications. The tanks support many features including vertical, open top vertical, cone bottom as well as open top cone bottom options. All tanks feature 8" lids and one standard fitting. A hinged lid option is also available on the open top styles. Both polyethylene and metal stands designed for all styles make these tanks very versatile. Tanks are manufactured from medium-density polyethylene with UV inhibitors and are designed for the containment of liquids up to 2.0 specific gravity. Tank walls are translucent for level viewing and equipped with liter and gallon indicators.

^ RT TANKS DESIGNED FOR SECONDARY CONTAINMENT TANKS ONLY

Open Top Tanks

Open Top Tanks are selected for collection systems, temporary liquid storage, or as secondary containment for vertical tanks in indoor or outdoor installations. Tanks are manufactured from medium or high-density polyethylene with UV inhibitors. Tank walls are translucent for level

viewing and equipped with gallon indicators. The Open Top Rectangle Tanks (RT) are ONLY for secondary containment purposes. They are not to be utilized for primary storage of liquids.

Dualine Tanks

When secondary containment is your first priority! Dualine tanks are free standing double wall tanks with flat bottoms for indoor or outdoor stationary applications. The double wall construction provides containment in the event the inner or primary tank is

compromised. An EPDM elastic seal is standard and seals the primary tank to the secondary tank to prevent dirt and moisture from entering the containment space between tanks.

Fuel Tanks

Fuel Tanks are manufactured from high-density cross-linked polyethylene with UV stabilizers and are available in natural and black colors. Tanks are designed for the containment of all chemicals (including gasoline and diesel fuel) rated for contact with cross-linked polyethylene. The standard weight tank is designed for chemicals with a specific gravity of 1.75. Tanks

are provided with a collection sump on the bottom for fitting installation, but because of the variety of applications, no fittings are furnished. Please consult factory regarding available fittings.

Crop Care Tanks

Crop Care tanks are designed for OEM sprayer applications that contain chemicals rated for contact with polyethylene. Hoop recesses are provided around the tank to facilitate installation and anchoring. Wide bottom tanks are available with either box-style or sloped-style sump on the bottom for withdrawal. Narrow bottom tanks are cut out on each side to facilitate

narrow track widths and are only available with a sloped-style sump. Larger tanks are furnished with polyethylene baffles for fluid control and a five-gallon rinse tank. The tanks are manufactured from high-density polyethylene with UV stabilizers designed for liquids of up to 1.9 specific gravity.

Roto-Molded Spot Sprayer Tanks

These tanks are designed as portable applicator supply tanks and are equipped with pump and equipment mount inserts. Tanks are equipped with molded in legs to support the tank and band locators for tie-down. Tanks mount with bottom inserts. Tanks are manufactured

from linear low-density polyethylene with UV inhibitors and designed for the containment of liquids of up to 1.7 specific gravity. Tank walls are translucent for level viewing and equipped with gallon indicators.

Blow Molded Applicator Tanks

Applicator tanks are designed with injection-molded leg inserts that allow the tanks to be anchored for transportable applications. They are furnished with brass inserts for pump and wand clip mounting. Tanks are manufactured from high-density polyethylene with UV

stabilizers and designed for containment of liquids up to 1.7 specific gravity. Tanks are equipped with U.S. gallon and metric indicators for liquid level viewing. These tanks are available in white or yellow.

† INDICATES CAN BE SHIPPED VIA UPS/FED EX

* PCO035 BANDS ARE STAINLESS STEEL. ALL OTHER SIZES ARE POWDER-COATED SILVER.

PCO Tanks

Pest Control Operator (PCO) tanks can be selected for stationary or transportable (non-DOT regulated) applications both indoors and outdoors. The 50-300 gallon tanks have a rounded bottom for best fluid drainage. A 2" deep sump option is also available on these sizes. PCO tanks must be securely anchored for

use in transportable applications and powder-coated steel bands are available for this purpose. The tanks are manufactured from medium-density polyethylene with UV stabilizers and designed for containment of liquids of up to 1.7 specific gravity.

Baffle partially installed

PCO300-37 comes with internal baffle for support and fluid control

Septic Tanks

These tanks are designed and manufactured to meet wastewater treatment system standards. The 1000, 1250, and 1500 gallon double-compartment septic tanks have been tested by NSF to meet the IAPMO Z1000 and CAN/CSA-B-66 standards. Consult

with the applicable state, county or local codes for polyethylene septic tank compliance and installation requirements. Manufactured from high-density polyethylene with UV inhibitors.

Cistern Water Tanks are designed for bulk storage or collection of potable water. Manufactured from high-density polyethylene with UV inhibitors, tanks are designed for containment of liquids up to 1.7 specific gravity. Tanks feature deep ribbing for strength to permit below-ground installations of up to 36" deep.

Exclusive Lid Design Only Ace Tanks have double-walled access covers that lock securely to the tank body and can be secured using nylon ties, eliminating the need for metal fasteners that can corrode and fail. They feature a custom-molded gasket in the lid. Manufactured from extruded Nitrile Rubber, the gasket snaps into the lid to make a watertight seal.

EXTENSION

Raises the opening of the tank from below grade to above grade and may be stacked to desired height.

RISER

The lid with an 8" pipe that may be used to inspect tank.

Aquifer Low Profile Cistern Tanks

These tanks are designed to provide a safe and durable means for the storage of potable or non-potable water. Their sectional ribbing design will sustain vertical soil pressures of up to 400 PSF. Tanks can be buried up to 28" deep and can be backfilled empty. Multiple fitting locations are provided to accommodate a variety of plumbing configurations. Manufactured from high-

density polyethylene with UV inhibitors. Aquifers are made from FDA compliant resins and conform to the requirements of NSF/ANSI Standard 61. Designed for the containment of liquids of up to 1.7 specific gravity. Tanks are available with burial lid or ground access assembly options.

Utility Cart

The Lil' Luggie Utility/Dock Cart is a two wheel utility transport cart. The cart provides 7.5 cubic feet of transport capacity and is designed for transporting loads up to but not exceeding 300 pounds total. The cart has 20" diameter wheels with semi-pneumatic tires with

sealed ball bearing support and an adjustable axle to allow load balance adjustments. Carts are manufactured from linear low density polyethylene with U.V. stabilizers. Assembly of frame and wheels required.

Pallet Pak Units

These units are designed for light-duty transport (non DOT regulated) for indoor or outdoor applications. The base of the pallet frame is designed for forklift transportability. The rectangular pallet paks have a metal frame and plastic base. The vertical paks have poly bases. The tanks are manufactured

from medium-density polyethylene with UV inhibitors and are designed for containment of liquids up to 1.7 specific gravity. Tank walls are translucent for level viewing and equipped with gallon indicators.

FEATURES

- Retainer ring molded into each fitting prevents the sealing gasket from expanding or sliding out of position under compression
- Bearing washer insures even compression on the gasket and promotes sealing
- Each fitting features left hand compression threads to prevent loosening while installing mating fittings
- Internal threads feature female pipe threads and are provided on both sides of the fitting. Mating fittings can be installed on both sides of the installed fitting
- Sealing gaskets are produced from durable Santoprene thermoplastic rubber (TPR)
- Fitting compression nuts feature a specially designed cross-section to prevent distortion under load

Lids are available in a wide range of sizes from 2" to 22". Most are available with or without venting to suit your applications. Injection molded from polypropylene with UV inhibitors ensures long life.

ANCHOR RITE CONCRETE SLAT FASTENER

The Anchor Rite quickly attaches hog confinement equipment to concrete slats. The Anchor Rite sits lower in the opening to prevent cracking of the concrete. The molded wedge features a larger, semi-elliptical profile to increase contact surface, lowering stress on slat sides.

HANG-R

The Hang-R is designed for easy installation of overhead water lines, electrical or computer wiring, tubing and much more. The 20-degree slant in the ring design allows the mounting screw to be driven straight up the mounting surface. A pre-formed 1/8" diameter hole prevents screw slippage.

CREEP MAT

The Creep Mat's non-porous, easy to clean polyethylene surface makes it a nice tool for several applications. Its patterned surface for traction and box rim helps to assist in pig weaning operations. It can also be utilized as a drip tray or for several other spill containment uses.

GUTTER PLUGS

Gutter Plugs are manufactured from heavy-duty polyethylene. They can be used to cap a pipe or gutter and provide a tight seal. They are available with a stainless steel handle in various lengths.

Please visit our website for more products and details: www.sowjoy.com

Spinwelds feature a hex driving recess to ease installation. This driving recess makes the installation tools universal and easy to construct. These spinwelds also feature a specially designed conical welding surface that helps to center the spinweld and increases the surface welding area.
